Dongyun Kim

FRONT-END DEVELOPER

(540) 986-8669 | dongyunkim96@gmail.com

dongyunkim.vercel.app | github.com/dongyunkim96 | LinkedIn

SUMMARY

Front-end developer building responsive web applications with React and TypeScript. Projects include a room planner, a weather-based clothing guide, and a cryptocurrency dashboard. Focused on clear interfaces, reusable components, and reliable behavior when data loads, changes, or fails.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, Python, SQL
Front End: React, React Router, Tailwind CSS, TanStack Query, Zustand, Redux Toolkit, responsive design
Tools & Testing: Git, GitHub, Vite, Vercel, Firebase, REST APIs, Vitest, Testing Library, Playwright

PROJECTS

SpaceFit | Interactive Room Planner | GitHub
React, TypeScript, SVG, Zustand, Dexie / IndexedDB

- Built a 2D room editor with real-world dimensions, draggable furniture, rotation, resizing, and undo/redo so users can try layouts before moving furniture.
- Added browser autosave, saved-project management, and JSON/PNG export; reused the SVG renderer across the editor, templates, and project previews.

WeatherWear | Weather & Clothing Guide | GitHub
React, TypeScript, TanStack Query, Open-Meteo API, Zod

- Connected location search and seven-day forecasts to a TypeScript rules engine that recommends clothing based on feels-like temperature, rain, wind, and personal preferences.
- Added saved places and trip packing lists, with cached forecasts, clear loading and error states, and keyboard-friendly location search.

CryptoPulse | Cryptocurrency Dashboard | GitHub
React, TypeScript, TanStack Query, Zustand, TradingView Lightweight Charts

- Built searchable, sortable market views, interactive price charts, and asset detail panels, with a watchlist that persists across browser sessions.
- Integrated CoinGecko data through a cached API layer and surfaced demo, stale, and unavailable states so users can understand the data they see.

Shilla-Bakery | Freelance Front-End Developer | GitHub
React, TypeScript, Vite, Tailwind CSS, React Router

- Built a responsive bakery website with a JSON-driven catalog of about 60 products, search, category filters, price sorting, and individual product pages.

EXPERIENCE

Software Engineer Trainee - Coding Temple | Remote | Jun 2025 - Apr 2026

- Developed React/TypeScript applications and Python/Flask APIs through project-based training, practicing CRUD workflows, testing, debugging, and deployment.

Software Engineer Trainee - CodeStates | Remote | Apr 2023 - Oct 2023

- Worked with front-end and back-end teammates to build React features, integrate APIs, and review changes through GitHub pull requests.

Signal Corps Soldier / Squad Leader - Republic of Korea Army | Aug 2017 - Aug 2019

- Maintained communications equipment, resolved technical issues, and trained junior soldiers; promoted to Sergeant and served as a squad leader.

EDUCATION & CERTIFICATIONS

Virginia Tech - Electrical Engineering | Blacksburg, VA
Certificates: Coding Temple - Software Engineering; CodeStates - Software Engineering
Meta - Front-End Developer; Google - Foundations of User Experience Design
