

Dongyun Kim

(540) 986-8669 | dongyunkim96@gmail.com | github.com/dongyunkim96 | linkedin.com/in/dongyun-kim-363487272

Front-end software engineer with hands-on experience building responsive, production-style web applications with React and TypeScript, including freelance client-facing work. Experienced in component-driven UI architecture, routing, data-driven interfaces, Firebase/Firestore, state management, REST APIs, testing, Git-based workflows, and deployment. Comfortable translating product requirements into polished, maintainable experiences across mobile and desktop.

SKILLS

Languages: JavaScript, TypeScript, Python, HTML5, CSS3

Front End: React, Vite, Tailwind CSS v4, React Router, Redux Toolkit, Material UI, Responsive Design

Back End / Data: Flask, REST APIs, Firebase, Firestore, SQL, PostgreSQL

Tools / Delivery: Git, GitHub, Jest, GitHub Actions, Vercel, VS Code, Postman

Concepts: Component Architecture, CRUD, Authentication, Client State, CI/CD, Responsive Web Design

PROJECTS

Shilla Bakery | Freelance Front-End Developer

GitHub

React, Vite, TypeScript, Tailwind CSS v4, React Router, JSON, Git, GitHub

- Designed and built a mobile-first bakery website with reusable navigation, layout, homepage, menu, and detail-page components that adapt smoothly across phone, tablet, and desktop breakpoints.
- Created a JSON-driven catalog of ~60 breads, desserts, and drinks with product images, English descriptions, pricing, search, category filtering, price sorting, and route-based product detail views.
- Implemented overlapping Recommended and Best Seller badges, responsive card grids, image hover interactions, and maintainable routing/content structure to support future menu and location expansion.
- Structured product content and static assets for straightforward Git/GitHub version control, keeping menu updates separated from reusable React presentation components.

EasyMart | Software Engineer

GitHub

React, Vite, Firebase, Firestore, Redux Toolkit, Material UI, React Router, Jest, GitHub Actions, Vercel

- Engineered a responsive e-commerce application with reusable product, cart, checkout, authentication, profile, admin, and order-history flows using React and Material UI.
- Integrated Firebase Authentication and Firestore for secure sign-in, user profiles, product CRUD, order processing, and user-specific purchase history.
- Used Redux Toolkit for predictable client state, added test coverage with Jest, and configured a GitHub Actions-to-Vercel delivery workflow for repeatable deployments.
- Worked through deployment and environment issues involving Vite, project-root configuration, Firebase data setup, and image handling to improve application reliability.

EXPERIENCE

Software Engineer Trainee - Coding Temple | Remote

06/2025 - Present

- Built responsive front-end applications with React, JavaScript, TypeScript, Vite, and Tailwind CSS by translating technical requirements into reusable components and maintainable UI patterns.
- Developed back-end functionality with Python, Flask, SQL, PostgreSQL, and REST APIs, strengthening experience with CRUD workflows, relational data, and full-stack application structure.
- Applied Git/GitHub, Firebase, Redux Toolkit, Material UI, testing, and deployment practices across individual projects and technical assignments.
- Completed project-based software engineering work spanning front-end architecture, API integration, databases, authentication, debugging, and deployment.

Software Engineer Trainee - CodeStates | Remote

04/2023 - 10/2023

- Collaborated with front-end and back-end developers in a team environment using React, JavaScript, HTML, CSS, Git, and GitHub to deliver shared application features.
- Coordinated API integration and client-side implementation through pull requests, code review, debugging, and cross-functional communication.
- Contributed to shared repository workflows and feature delivery while coordinating implementation details across front-end and back-end responsibilities.

Signal Corps Soldier / Squad Leader - Republic of Korea Army

08/2017 - 08/2019

- Managed military communication systems and troubleshooting procedures in time-sensitive environments to support reliable information flow and operational readiness.
- Led and trained junior soldiers as a squad leader, earning promotion to Sergeant through consistent performance, accountability, and leadership.

EDUCATION

Coding Temple - Certificate - Software Engineering

CodeStates - Certificate - Software Engineering

Meta - Certificate - Meta Front-End Developer

Google - Certificate - Foundations of User Experience Design

Virginia Tech - Electrical Engineering, Blacksburg, VA
